Subject: SBC/Ameritech telecom policies

JAN 1 2 2003

To whom it may concern:

America needs a fair telecom policy that encourages the growth and maintenance of the best network in the world. This will be accomplished by setting fair wholesale prices and creating a level playing field. CWA members have built the best network in the world and their jobs are at risk unless these unfair policies are immediately changed.

Service has and will continue to deteriorate because of the unfair policies that still exist. SBC is not company that is laying off because of UNE-P prices. They can no longer compete or provide service when they lose money to put back into the network.

Thank you for your time

Sincerely,

Thomas Dixon
